

Post-Wildfire Checklist

Before returning home, **ALWAYS** check with local officials that the area is safe to return to your home

Check grounds for hot spots, smoldering stumps, and vegetation

Check throughout your house for any hidden burning sparks or embers.
Don't forget under decks, attics, basements, inside cupboards, closets and vents.

Once you are sure all of the appliances are turned off and that there is no damage to the meter, you may turn on the main circuit breaker

Check smart home systems are all in working order

Check that your landline phone is working

Inspect roof, rain gutters and under overhangs for hot embers

Report any damage you find to local utility companies such as the gas & electric or telephone
